

Tulane School of Science & Engineering Seminars (Open to the Public)

Compiled by the Science and Engineering Honor Society (SEHS)

/ SPRING 2012 /

"Lecture Title"

Speaker's name – Affiliated University/Organization

Time and Location

Sponsoring Department/Organization

Special Notes

Week of February 20th

Thursday

"Deforming Associatives in G2 Manifolds"

Selman Akbulut – Michigan State University

3:30PM, Gibson 325

Mathematics

Friday

"Inferring Colonization Histories from Genetic Kinship Analyses"

Jim Hamrick – University of Georgia

11AM, LBC 213

Ecology and Evolutionary Biology

"Where and Why Uranium is Concentrated in Natural Settings and Rocks: Is It Time for a Paradigm Shift?"

Dr. Troy Rasbury – Stony Brook University

12PM, Science and Engineering Lab Complex: Room 219

Earth and Environmental Sciences

"Antigen Structure Shapes T-Cell-Mediated Immunity"

Samuel J. Landry – Tulane University School of Medicine

3PM, Stanley Thomas 302

Mathematics (Computer Science)

"Alternating Evolution Schemes for Hamilton-Jacobi Equations"

Michael Pollack – Iowa State University

3:30PM, Stanley Thomas 101

Mathematics (Applied and Computational Mathematics)
